## EXECUTIVE SUMMARY

In August 2021, the International Monetary Fund (IMF) allocated by far the largest allocation to date of Special Drawing Rights (SDRs) amounting to SDR 456.5 billion (equivalent to about US\$650 billion). This allocation was to address the long-term global need for reserves, build confidence, foster the resilience and stability of the global economy and help countries cope with the impact of the COVID-19 pandemic. At the time of this allocation, most countries in Africa were facing serious economic challenges which were exacerbated by the effects of the Covid-19 Pandemic. External financing to help the African continent recover was not available because most of the countries in Europe, North America and even China itself were trying to solve economic woes of their own which the pandemic had inflicted on their respective economies. Therefore, the IMF allocation of the 2021 SDRs provided much needed financing for African countries which had no other alternative ways to finance their way out of the Covid-19 Pandemic.

Like many other countries around the world, Zambia was also affected by the Corona Virus and its impact on the Zambian economy was quite devastating. Many sectors of the economy were shut down and this meant that very little economic activity was carried out during this time. The health sector was overwhelmed as global supply chains were disrupted and struggled to meet the demand for basics such as personal protective equipment (PPE). This also led to the shortage of other drugs in hospitals and health centers across the country. The tourism sector was among the hardest hit sectors as international travel came to a halt. Leisure and hospitality businesses also suffered greatly during the economic shutdowns. Even when restaurants were operating on takeaway basis, they could not make enough money to survive through the pandemic.

Each country that receives SDRs from the IMF decides on its own how it will utilize its SDRs. For example, Zambia decided to use its SDRs to boost its foreign exchange reserves and it also used some SDRs to support its 2022 budget to fund social sector expenditure.

This report assesses the allocation and use of the Special Drawing Rights (SDRs) in Zambia. It looks at how the Zambian Government spent its SDRs and the sectors of the economy which benefited from the SDRs. The report also shows how the recipient ministries and institutions spent their allocated SDRs.

The study shows that SDRs funded the Constituency Development Fund (CDF)'s Youth & Women Empowerment Funds in the Ministry of Local Government and Rural Development as well as the Ministry of Health (Grants to the hospitals, and Drugs, Medical Supplies, Equipment & Covid-19 Vaccines), Ministry of Community Development and Social Services (Food Security Pack, Social Cash Transfer), and the deficit gap in the Public Service Pensions Fund (PSPF).

The SDRs funded Youth and Women Empowerment Funds in the Ministry of Local Government and Rural Development which fall under the Constituency Development Fund (CDF) which is meant to take resources closer to the people. An example of approved skills development recipients in a selected constituency is given in the report.

The SDRs also funded the Social Cash Transfer (SCT), the Rain Fed, Wetlands and Alternative Livelihood Programmes in the Ministry of Community Development and Social Services. SDRs also helped fund Grants to all the hospitals in Zambia and these grants cover operation costs. The

Zambia Medicines and Medical Supplies Agency (ZAMMSA), also received SDRs which it used to finance the purchase of drugs, medical supplies, equipment & Covid-19 Vaccines.

SDRs have helped reduce the waiting period for pensioners to receive their money (from more than three years to less than a year), however, it should be mentioned that SDRs are not a sustainable way of financing PSPF. Due to this, the reforms recommended by the PSPF board are critical to making PSPF sustainable and to help it make payments to pensioners. If these reforms such as the incorporation of public service workers in an occupational pension scheme are not addressed by the government, destitution and poverty among pensioners is likely to go up in Zambia. The government could also address the financing gap by paying what it owes PSPF and the pensioners on the separatees payroll should not be on it for too long to avoid government inefficiencies and critical positions being vacant for long periods of time.

The research highlighted the need for government departments such as the Department of Community Development in the Ministry of Community Development and the Disaster Management and Mitigation Unit (DMMU) to coordinate better in times of crisis such as droughts and floods. It also highlighted that the procurement function of the Ministry of Health is now the responsibility of ZAMMSA and that ZAMMSA started on a new footing without any debt in its books. The commercialization of ZAMMSA is critical to it becoming a viable business and its timely funding is also necessary to ensure that it procures enough drugs, medical supplies, equipment and Covid-19 vaccines to be distributed around the country. This could mitigate the shortage of drugs across the country and enhance ZAMMSA's performance.

Since SDRs are not a sustainable way of financing the social sector programmes which the Zambian government financed through its allocated SDRs. The Zambian Government should instead look for other sustainable ways of financing its Social Cash Transfer programme. The number of beneficiaries should not increase due to the promise of more aid from its cooperating partners who help fund the programme. The same could be said about the youth and women empowerment funds, grants to all the hospitals in the country, the Food Security Pack (FSP), PSPF's financing gap and drugs, medical supplies, equipment and Covid-19 vaccines. All these are great social programmes which the government needs to have sustainable sources of financing in order to enhance them and to keep them running.

Since every government has the right to decide how, when and where to spend its SDRs, the JENA and JCTR researchers commend the Zambian Government on how it has utilised SDRs thus far and this level of transparency from the government should continue if we are to advocate for more SDRs allocation towards Africa.

## Introduction

### 1.1. Background

In August 2021, the International Monetary Fund (IMF) allocated by far the largest allocation to date of Special Drawing Rights (SDRs) amounting to SDR 456.5 billion (equivalent to about US\$650 billion). This allocation was meant to address the long-term global need for reserves, build confidence, foster the resilience and stability of the global economy and help countries cope with the impact of the COVID-19 pandemic (IMF, 2021).

The International Monetary Fund (IMF) has been allocating SDRs to its member countries since 1972, when it first allocated SDR 9.3 billion in yearly instalments in 1970–72. Another SDR 12.1 billion was allocated in yearly instalments in 1979–81. During the financial crisis of 2009, SDR 161.2 billion was allocated on August 28, 2009. In the same year of 2009, a special one-time allocation of SDR 21.5 billion took effect on 9 September 2009 to correct the fact that members joining the IMF after 1981 had never received an allocation (the Fourth Amendment special allocation) (IMF, 2022).

Like many other countries around the world, Zambia was also hit by the Corona Virus and its impact on the Zambian economy was quite devastating. Many sectors of the economy were shut down and this meant that very little economic activity was carried out during this time. The health sector was overwhelmed as global supply chains were disrupted and struggled to meet the demand for basics such as personal protective equipment (PPE) (Harvard Business Review, 2020). This also led to the shortage of other drugs in hospitals and health centres across the country. The tourism sector was among the hardest hit sectors as international travel came to a halt. Leisure and hospitality businesses also suffered greatly during the economic shutdowns. Even when restaurants were operating on takeaway basis, they could not make enough money to survive through the pandemic.

The Zambian Government received SDR 937.6 which was approximately US \$1.3 billion (Zambian Business Times, 2021). It decided to use its SDRs to boost its foreign exchange reserves and it also used some SDRs to support its 2022 budget to fund social sector expenditure.

The Ministry of Finance disbursed the SDRs to three ministries and one institution to fund social sector spending. The three ministries are: The Ministry of Local Government and Rural Development, The Ministry of Community Development and Social Services and the Ministry of Health. The only Institution that received SDRs is the Public Service Pensions Fund (PSPF).

### 1.2. What are SDRs?

Special Drawing Rights (SDRs) are an asset that is used as an accounting unit for IMF transactions with member countries and a stable asset in countries' international reserves. SDRs are not money because they can't be used to buy things and their value is based on a basket of the world's five leading currencies – the US dollar, euro, yuan, yen and the UK pound (IMF, 2022).

### 1.3. Scope and methodology

The scope of this study was to assess the allocation and use of SDRS in Zambia between January and May 2022. The methods which were employed to carry out the study are document review, key informant interviews, thematic analysis of narratives from key informants and graphical analysis.

### 1.4. Literature review

How each country spends its SDRs is up to that country's government. The IMF does not impose conditions on how SDRs should be utilised by its member countries (IMF Policy Paper, 2021). Literature gives several uses of SDRs such as: SDRs can be used to boost reserve assets and also boost foreign reserves of a country; SDRs can be used as self-insurance to face the boom and bust of speculative capital flows and contain their adverse effects; SDRs give countries the ability to curb depreciation with the liquidity backstop that foreign reserves provide; SDRs can be used to transact with the IMF and IMF member countries (Hawkins P., Prates D., 2021), (Alessandrini P., Presbitero A., 2012), (Caldentey E., Armah B., 2022).

## 2. PRESENTATION OF RESULTS

### 2.1. MINISTRY OF FINANCE SDRs DISBURSEMENTS

The Zambian Government received SDR 937.6 which was approximately US \$1.3 billion. It decided to use its SDRs to boost its foreign exchange reserves and it also used some SDRs to support its 2022 budget to fund social sector expenditure.

As shown in figure 1, the Ministry of Finance disbursed SDRs between January and May 2022. The disbursements targeted social sector expenditure in the Ministry of Community Development and Social Services, the Ministry of Local Government and Rural Development, The Ministry of Health and the Public Service Pensions Fund (PSPF). Therefore, the SDRs were used to provide relief to the social sector of Zambia's economy.

It should be noted that there have been other disbursements by the Ministry of Finance since May.

## 2.2. PSPF SDRs REPORT

The 2022 PSPF budget allocation was funded by the Special Drawing Rights which were allocated to the Zambian government by the International Monetary Fund (IMF). PSPF received a total of K2, 067,042,479.00 from the Ministry of Finance. The received amount accounted for 100% of the 2022 PSPF budget allocation. Thus far, the funds received have been utilised to dismantle outstanding lump sum and monthly pension benefits resulting in the reduction of the average waiting period from three years to less than a year. The table below highlights a summary of payments made to the beneficiaries as at 15<sup>th</sup> July, 2022.

**Table 1. PSPF 2022 payments**

BENEFICIARY CATEGORY	AMOUNT (ZMW)	NUMBER OF BENEFICIARIES
Lump Sum benefits	1561,440,028.97	2,232
Monthly pension benefits	388,759,753.12	Average of 60,339 beneficiaries per month

From the information in the table, the total amount paid to the beneficiaries amounted to K1, 950, 199, 782.09. The balance of K116, 842, 696.91 from the total of K2, 067,042,479.00 received from the Ministry of Finance has since been paid to other beneficiaries since this information was made available.

Before the creation of the Public Service Pensions Fund (PSPF) in 1996, retired civil servants in Zambia were under a department in the Ministry of Finance. All the pensioners (Civil Servants, Police Officers and members of the defence forces) that were being attended to by this department in the Ministry of Finance were transferred to PSPF when it was created in 1996.

In 1996, the Public Service Pensions Fund (PSPF) was created through an act of Parliament No. 35 of 1996 CAP 260 of the laws of Zambia. Its core business is to provide pensions to public workers. At the time of its creation, PSPF was already a mature scheme because it inherited liabilities of pensioners but the asset base was not there. Unlike the National Pension Scheme Authority (NAPSA), which was formed in 2000 and only started making payments to its clients (retirees or pensioners) after 15 years (in 2015), PSPF already had clients that needed to be paid their pensions when it was created.

The legal framework which governs the pension schemes in Zambia provides for both a national pension scheme and an occupational pension scheme. Zambia's national pension scheme is governed by National Pension Scheme Act no.40 of 1996 and is managed by NAPSA. It covers both the public and private employees, formal and informal workers and targets an Income Replacement Ratio (IRR) of 40%.

Occupational Pension Schemes for the private sector and parastatals are governed by the Pensions Scheme Regulations Act no. 28 of 1996 and managed by various private pension institutions which are regulated and supervised by the Pensions and Insurance Authority (PIA). This means that parastatals and private employers providing occupational pension schemes provide additional pension to the basic pension provided by NAPSA. Hence the expected pension for such a category of employees is above the targeted basic pension with an Income Replacement Ratio (IRR) of 40%.

Occupational pension schemes for public workers and local government workers including some parastatals on the other hand, are supposed to be managed by the Public Service Pensions Fund (PSPF) and Local Authority Superannuation Fund (LASF) in line with the Public Service Pensions Act no. 35 of 1996 and Local Superannuation Fund Act, respectively. However, because of the misinterpretation of the law, it was believed that the two institutions were closed by the enactment of the NAPSA Act when in fact no law ever closed the two institutions. As a result of the misinterpretation of law, public workers who joined work in 2000 after the establishment of NAPSA are not covered by PSPF. This means that their IRR is limited to only 40% offered by NAPSA and are hence disadvantaged. The Attorney General's legal opinion provided in January 2020 revealed that PSPF is still a going concern mandated by law to provide an occupational pension scheme to its category of members through a statutory instrument.

If not addressed, the non-incorporation of public service workers in an occupational pension scheme, in this case PSPF, is likely to lead to inadequate pension after retirement and this may lead to high levels of destitution and poverty among pensioners in Zambia.

Currently, the Public Service Pensions Fund Board is proposing to introduce a new scheme for public service workers (excluding defence and all Security wings) who joined the civil service after the establishment of NAPSA. These employees do not have an occupational pension scheme and the proposed scheme is aimed at enhancing their Income Replacement Ratio (IRR) by an

additional 20% IRR from the 40% currently provided by NAPSA, so that a total of 60% IRR is provided.

The reforms being proposed by the PSPF board as mandated by law and to enhance the pension for public service workers who are not covered by an occupational pension scheme take into account actuarial assessment results. The proposed scheme provides parameters that are sustainable and targets an IRR of 20% and expected to be financed by Investments and Member Contributions. Benefits of the proposed scheme include:

- I. Public workers will benefit from an occupational pension scheme which will increase the targeted IRR from the current 40 % offered by NAPSA to 60% (20% additional from the scheme)
- II. Public workers will benefit from both microfin and mortgage facilities which will enable them pursue investment opportunities and acquire affordable shelter/accommodation which will help reduce poverty and prevent destitution in old age
- III. The scheme will be sustainable based on the scheme design and structure and that contributions from members will be invested to grow the Fund before members begin to access their benefits
- IV. National Interest cases will be taken care of under the new scheme, therefore Govt will not be forced/compelled to retain officers on separatees payroll for members currently under NAPSA
- V. The parameters of the scheme will not be embedded in the Act but in Regulation to avoid the current situation
- VI. The scheme will assist in mitigating the monthly pension bill of the current scheme especially under option 3 (As is the current case for NAPSA where it is assisting setting off NPF benefits)

It should be noted that PSPF is a defined benefits scheme and this means that its actuarial liabilities are greater than its assets. The difference between PSPF's actuarial liabilities and its assets creates a deficit and in this case, it is the government's obligation as the employer of public workers to cover the deficit. Over the years, the government in trying to cover the deficit has been funding PSPF and that is the allocation that is reflected in Zambia's national budget each year.

The lump sums paid by PSPF to pensioners can be paid as one third (33%) or two thirds (67%) of the lump sum the pensioner is entitled to. Most if not all pensioners opt to get two thirds or 67% of their lump sum pension and the balance of 33% is paid over the lifetime of the pensioner. These lump sum payments cause huge cash outflows from PSPF and leave the institution with less money to invest and they also widen the deficit. Pensioners getting 67% of their pension also means that PSPF will pay them less money (33% of their lump sum) over their lifetime.

PSPF is currently facing misalignment of contributions and benefits because the contributions are supposed to fund the pensions and they are not able to do that. According to the latest actuarial

report (2020), the contribution rate is supposed to be 38.6%, however, PSPF only gets 14.5% resulting in a shortfall of 24.1%. See figure 2. This could be attributed to the decline in active membership since the creation of NAPSA and people thinking that PSPF is now defunct. This has made the financing gap or deficit grow even bigger. In essence, PSPF is spending more than it receives in contributions from its clients.

**Figure 2. PSPF’s Financial Position as at the last valuation date in 2020**

	31 December 2017 K' million	31 December 2020 K' million
<b>Value of Assets</b>	<b>1 215</b>	<b>1 537</b>
<b>Liabilities</b>		
Civil Service	(25 530)	(28 241)
Ministry of Defence	(13 296)	(16 379)
Office of the President	(1 376)	(1 373)
Pensioners	(6 802)	(5 965)
Suspended Pensioners	(390)	0
<b>Total Fund Liability</b>	<b>(47 394)</b>	<b>(51 958)</b>
<b>Surplus/(Deficit)</b>	<b>(46 179)</b>	<b>(50 421)</b>
<b>Funding Level</b>	<b>2,6%</b>	<b>3,0%</b>

Source: PSPF

From the figure above, PSPF’s liabilities increased from K47,3 billion in 2017 to K51,9 billion in 2020. Its deficit also increased from K46,1 billion in 2017 to K50,4 billion. The value of PSPF’s assets also increased from K1,2 billion to K1,5 billion. PSPF’s current actuarial deficit is K50,4 billion and its funding level is 3%, representing the assets that PSPF has to meet its liabilities. PSPF could reduce the deficit if it were allowed to provide occupational pensions schemes for the newly employed public workers. This would allow PSPF to collect contributions from public workers that are contributing to NAPSA and use them to make payments to pensioners and make investments. The government should also settle its debt with PSPF to help the institution function more efficiently.

Article 189 of the amended constitution keeps pensioners on the government’s payroll (Separatees payroll) until the pensioners get their lump sum pension and at the same time, they are also entitled to their monthly PSPF pension. Some of the problems this has caused include: Government positions not being filled until a person is paid their lump sum pension; Government productivity has been lowered due to it having less manpower. If the government could use the separatees payroll to pay pensioners their lump sum pension, the deficit would be significantly reduced.

Previous funding from the government had been very poor and not enough to finance the gap or deficit. This in turn created long waiting periods of more than three years. At the moment, PSPF manages to make monthly payments to all its clients (more than 60,000 pensioners and beneficiaries) and it spends an average of K66,000,000 per month. This amount is obtained from PSPF’s investments and contributions and the government grant is also sometimes used to make monthly payments.

## 2.3. MINISTRY OF HEALTH SDRs REPORT

In the 2022 National Budget, the Health Sector was allocated K13,911,599,575, which represented about 8% of the budget. Part of this allocation was funded by the Special Drawing Rights (SDRs), which were issued by the International Monetary Fund (IMF). The disbursed SDRs by the Ministry of Finance to the Ministry of Health have been used to finance grants to all the hospitals in Zambia and purchase drugs, medical supplies, equipment and Covid-19 Vaccines.

### 2.3.1. GRANTS TO HOSPITALS

The disbursed grants, funded by SDRs to all the hospitals in the months of January, February, March and April is given in table 2 below.

**Table 2. Grants to the Hospitals**

<b>Description</b>	<b>JANUARY</b>	<b>FEBRUARY</b>	<b>MARCH</b>	<b>APRIL</b>
	<b>Actual</b>	<b>Actual</b>	<b>Actual</b>	<b>Actual</b>
Ministry of Health – Grants to the Hospitals	K40, 000, 000	K40, 000, 000	K30, 000, 000	K150, 000, 000

Grants to the hospitals are used to finance hospital operations and the costs include but may not be limited to the following:

- 1) Cleaning materials
- 2) Payment of utilities
- 3) Procurement of fuel
- 4) Medical stationery
- 5) Office equipment
- 6) Maintenance costs
- 7) Office costs
- 8) Food for patients
- 9) Medical and surgical supplies etc

Grants that were disbursed to all the hospitals are given in the following figures:

**Figure 3. Grants to Hospitals in Central Province**

## 2.3.2. DRUGS, MEDICAL SUPPLIES, EQUIPMENT AND COVID-19 VACCINES

Medicines and medical supplies include:

1. Medicines (Drugs that are used for treatment such as antibiotics, painkillers, ARVs, etc)
2. Medical supplies (Surgical consumables, laboratory supplies and equipment. Covid-19 vaccines are separate entities.

Under Public Health, there are Covid-19 vaccines.

Between January and May 2022, the Ministry of Health received a total of K2, 278, 246, 778.57 as funding for drugs, medical supplies, equipment and Covid-19 vaccines which it then disbursed to various recipient departments and institutions. Figure 13 shows how this disbursement was split between the Zambia Medicines and Medical Supplies Agency (ZAMMSA) and the Department of Public Health in the Ministry of Health.

The Department of Public Health in the Ministry of Health is in charge of Covid-19 vaccine funds. Funds for Covid-19 campaigns were disbursed to all the ten provinces and a small amount remained at the Ministry of Health headquarters. The department will decide how the remaining balance of the Covid-19 funds will be utilised. Figure 14 shows Covid-19 campaign funds disbursed to all the ten provinces of Zambia.

The Zambia Medicines and Medical Supplies Agency (ZAMMSA) in coordination with the Department of Clinical Care and Diagnostics Services is in charge of the funds for drugs and medical supplies.

Procurement of medicines and medical supplies is no longer a function of the Ministry of Health. The procurement of medicines and medical supplies in the Zambian Government is now the responsibility of the Zambia Medicines and Medical Supplies Agency (ZAMMSA). This was done to make ZAMMSA more efficient and effective and to help it respond to changes in its store room in a timely manner. The other reason why the procurement function of medicines and medical supplies now rests with ZAMMSA is to commercialise the institution. This means that ZAMMSA will now be able to charge a fee for medical storage, repackaging of drugs and selling them to the government and to other countries in the region.

### 2.3.3. THE ZAMBIA MEDICINES AND MEDICAL SUPPLIES AGENCY (ZAMMSA)

ZAMMSA was formerly known as Medical Stores Limited (MSL). Medical Stores Limited was a State-Owned Company (SOC) wholly owned by the Government, with the Ministry of Finance

owning 98% of it and the Ministry of Health only owning 2%. This disadvantaged the Ministry of Health because it had a lesser role to play in the management of Medical Stores Limited.

The Zambia Medicines and Medical Supplies Agency (ZAMMSA) Act No. 9 of 2019 created the Zambia Medicines and Medical Supplies Agency (ZAMMSA). In February 2021, a Commencement Order to bring into effect the Zambia Medicines and Medical Supplies Agency (ZAMMSA) Act No. 9 of 2019 was published in the Government gazette and MSL was transformed into ZAMMSA.

Before October 2021, the drugs budget was K1.4 billion against the desired K5.2 billion and this contributed to the severe drugs shortage in the country. The previous government managed to cover the deficit by getting drugs on credit (K2.2 billion debt). This debt was taken up by the Ministry of Finance as part of the Ministry of Health's debt, to avoid ZAMMSA, a newly created government institution from having any debt on its books. The procurement of drugs on credit by the previous government led to a standoff between the government and the suppliers of medicines and medical supplies and it could also have contributed to the shortage of drugs in the country. The Covid-19 pandemic also greatly contributed to the shortage of drugs in Zambia as it disrupted global supply chains and ZAMMSA was equally affected.

After October 2021, the new government increased funding for medicines and medical supplies in its 2022 budget to K3.4 billion (see figure 15). The K3.4 billion budget allocation is due to the fact that the government allowed ZAMMSA to carry over about K400 million and this amount was added to the 2022 budget. Thus far, about K2.9 billion has been released and this translates to about 85% of the budgeted amount already released in the first six months of 2022. However, ZAMMSA could not procure the medicines and medical supplies without the necessary structures in place. Its board was appointed in late 2021, the Director General was appointed in August 2022 and ZAMMSA started on a new footing without any debt.

Zambia imports over 90% of its medicines and medical supplies. The long delivery lead time associated with the pharmaceutical industry also impacts the availability of medicines in Zambia and it contributes to the shortage of drugs in the country. Due to the long delivery lead times, procured medicines and medical supplies in Zambia take 6-12 months to deliver.

Zambia's pharmaceutical industry is only able to meet 5-10 % of the local demand and this is far too little compared to the volumes that Zambia needs in its hospitals and health centres. Currently, the country is surviving on 5 -10% locally manufactured medicines.

The new government has boosted the confidence of medicines and medical suppliers because the government through ZAMMSA will now be paying cash on delivery to avoid the institution owing its suppliers any money.

**Figure 15. Budget performance of ZAMMSA’s drug fund for the year 2022.**

**Source: ZAMMSA**

ZAMMSA currently practises a cash on delivery system. Thus far, K377 million has been paid for the procurement of ARVs and other medicines. Medicines and medical supplies whose contracts have been signed and not yet delivered amount to K1.2 billion. Uncommitted money amounting to K356 million has been set aside to procure drugs on the international market. ZAMMSA also aims to save money through negotiations where it seeks to pay the right price.

For the year 2022, the government has been very efficient at disbursing money to ZAMMSA as evidenced by over 85% of the total 2022 budget allocation which has already been disbursed. See figure 16 below.

**Figure 16. ZAMMSA 2022 expenditure**

Source: ZAMMSA

As at 7<sup>th</sup> October 2022, the total remitted funds by the government to ZAMMSA was K2, 924,530,338.49, accounting for over 85% of the 2022 budget allocation. The balance of the 2022 budget allocation yet to be received by ZAMMSA is less than K350 million. Signed contracts with delivery in progress for medicines and medical supplies amount to a little over K680 million. Approved contracts pending award to successful bidders are valued at K563, 673, 569.99. Tenders under evaluation are estimated at K1, 108, 621, 868.

ZAMMSA handles about 70% of the Ministry of Health’s budget and its current distribution is quite efficient because the agency does not store commodities for a long time. The commercialization of ZAMMSA is critical to it becoming a viable business and its timely funding is also necessary to ensure that it procures enough drugs, medical supplies, equipment and Covid-19 vaccines to be distributed around the country. This could mitigate the shortage of drugs across the country and enhance ZAMMSA’s performance.

## 2.4. MINISTRY OF LOCAL GOVERNMENT & RURAL DEVELOPMENT SDRS REPORT

By May 2022, the Ministry of Local Government & Rural Development had received a total of K401, 542, 610 from the Ministry of Finance and National Planning as disbursement for Skills and Empowerment Funds under the Constituency Development Fund (CDF). This allocation to the Ministry of Local Government & Rural Development was part of the Special Drawings Rights (SDRs) that the Zambian Government received from the International Monetary Fund (IMF) in August 2021. The Zambian Government decided to use part of the SDRs to fund a component of the Constituency Development Fund (CDF) and specifically the Youth and Women Empowerment Funds.

The disbursed funds were equally shared among the 156 constituencies of Zambia to finance Youth and Women Empowerment Funds. Youth and Women Empowerment Funds constitute twenty percent (20%) of the CDF allocation to each constituency and are divided into grants and loans. Forty percent (40%) of the Youth and Women Empowerment Funds are meant for grants, while sixty percent (60%) are meant to cover loans.

The grants from the Youth and Women Empowerment Funds are meant to be used as seed money to finance various economic activities being undertaken by different youth and women's groups in all the constituencies of Zambia. The minimum amount issued as grants is five thousand kwacha (K5,000) and the maximum amount is forty thousand kwacha (K40,000). This will provide very cheap financing for youths and women to start business or to inject much needed capital in their already existing businesses. It also empowers youths to acquire skills that empower them to work for themselves and they could end up owning small businesses and employing other youths. So far, grants have already been issued in all the 156 constituencies through the local authorities in Zambia.

The loans from the Youth and Women Empowerment Funds are yet to be issued. They have not yet been issued because the Government thought it best to have financial institutions handle the loan disbursements. Earlier in 2022, the Government through the Ministry of Local Government & Rural Development advertised a tender to the financial institutions in order to select the financial institutions they would partner with to issue loans. The tenders were restricted to the financial institutions that the Government has an understanding with. The loans that will be issued as part of the Youth and Women Empowerment Funds will be issued at an interest rate of 5%. This will provide very cheap financing and make it easier for the youths and women in the constituencies to pay back these loans.

According to the 2022 CDF guidelines, Youth, Women and Community Empowerment funds are handled as follows:

*Implementation of the empowerment component of the CDF shall adopt an inclusive approach. The empowerment Fund shall prioritise the youths, women, people living with disability and other vulnerable persons in the community. Empowerment beneficiaries shall be equipped with seed money in form of grants given to Organised Groups, Clubs and Cooperatives. Additionally,*

*empowerment loans shall be given to cooperatives and individuals with established small and medium scale businesses wishing to grow their businesses within the Constituency.*

*The youths alone constitute a large proportion of the Country’s productive age group and this empowerment will target programs that address youth related challenges such as limited access to education and skills development, limited access to factors of production including finance, limited employment and empowerment opportunities. Empowerment of the women and other vulnerable persons will contribute towards the reduction of vulnerability and improving livelihoods of the community.*

*The component shall promote apprenticeship, mentorship and business development services to support enterprise development and creation of market linkages for the youths and women. This will be attained by outsourcing such services from technical service providers such as Technical Education Vocational Entrepreneurship Training Authority (TEVETA), Non-Governmental Organisations (NGOs), Chamber of Commerce, and captains of industry within the Constituency. (2022 CDF guidelines)*

The total allocation of CDF per constituency is shown in the table below.

**Table 3: CDF Allocation**

<b>S/No.</b>	<b>Components</b>	<b>Percentage</b>
1	Community Projects <ul style="list-style-type: none"> <li>● 5% Disaster contingency</li> </ul>	60%
2	Youth and Women Empowerment <ul style="list-style-type: none"> <li>● 40% Grants</li> <li>● 60% Soft loans</li> </ul>	20%
3	Secondary School (Boarding) & Skills Development Bursaries	20%
<b>TOTAL</b>		<b>100%</b>

The total allocation of the CDF per Constituency is distributed among three major components as shown in the table above. The administrative costs for the management, disbursement, utilisation and accountability of CDF shall not exceed 5% of the total CDF allocation as provided by the CDF Act.

The following figures are examples of the 2022 CDF skills development submissions in one constituency. The name of the constituency, ward, name of institution and guardian details in the table was removed because this information was not yet in the public domain at the time the researcher was given the information by the Ministry. However, some of the applicants were called at random to verify their existence and their application for skills development in this constituency.

On the other hand, the name of the student, their area of study, amount and guardian details except phone number is visible.

**Figure 18. CDF applications submitted for approval in the given constituency.**

Constituency Name:		Constituency				Comments
Component	Number of Application	Applications submitted for approval		Number of applications Deferred		
		Number	Cost (ZMW)			
Community Project		53	15	3,483,846.21	38	<i>To be considered for next year's allocations</i>
Empowerment	Grants (%)	194.00	72.00	1,464,899.76	122.00	<i>To be considered in the remaining year's allocations</i>
	Loans (%)	-	-	-	-	
Bursaries	Secondary (%)	10	10	12,350.00	0	
	Skills	167	154	834,470.00	13	<i>Did not meet the required qualifications</i>

Source: Ministry of Local Government and Rural Development

The figure above shows the applications submitted for approval under community projects, empowerment funds and bursaries. In this particular constituency, 53 applications were received for community projects and only 15 were submitted for approval at a cost of K3, 483, 846.21. There were no applications for loans as the loans for the Youth and Women Empowerment Funds are yet to be issued. The loans have not yet been issued because the Government is yet to pick financial institutions to handle the loan disbursements. However, since the grants are already available for constituents to apply for, this particular constituency did receive applications for grants and 72 were submitted for approval. The outstanding 122 applications for grants would be considered in other CDF allocations before the end of the year.

The following figures show approved names of skills development applicants in 2022. And just like the previous figures some information was removed due to it not being in the public domain when the researcher was given the information by the Ministry. The total number of applicants for skills development was 167 and 154 were submitted for approval while 13 did not meet the criteria. The names of students and their respective areas of study are given in figure 19.

**Figure 19. Names of Approved Skills Development Applicants 2022**

## 2.5. MINISTRY OF COMMUNITY DEVELOPMENT AND SOCIAL SERVICES SDRs REPORT

### 2.5.1. SOCIAL CASH TRANSFER SDRs REPORT

The Ministry of Community Development and Social Services' Social Welfare Department received K846, 587, 920 between January and May 2022 from the Ministry of Finance. This allocation by the Ministry of Finance to the Department of Social Welfare was part of the Special Drawing Rights (SDRs) allocated to the Zambian Government by the International Monetary Fund. The SDRs helped fund the Department of Social Welfare's Social Cash Transfer payments to the extremely poor and incapacitated households in all the districts of Zambia.

The extremely poor and incapacitated households are the most disadvantaged in society and need to be protected from extreme poverty, high unemployment and the effects of HIV and AIDS. These households need regular and continuous social assistance from the government to help them survive and to meet their basic needs. The government through its Social Cash Transfer Programme (SCTP) which is administered by the Ministry of Community Development and Social Services (MCDSS) through the Department of Social Welfare attempts to help the extremely poor and incapacitated households. The programme falls under the Social Assistance Pillar of the National Social Protection Policy.

The Social Cash Transfer Programme (SCT) is aimed at reducing extreme poverty and eradicating intergenerational transfer of poverty in Zambia.

The Government of Zambia and its cooperating partners (The World Bank, Government of Sweden, Irish Aid, Government of Germany, The Swiss Government and The Foreign, Commonwealth & Development Office (FCDO)) fund the Social Cash Transfer Programme. Social cash transfers are regular non-contributory payments of money provided by the government and its cooperating partners to individuals or households.

The Social Cash Transfer Programme has increased the number of its beneficiaries to 973, 323 (as at July 2022) from 880, 539 beneficiaries in August 2021. The beneficiaries are in all the districts of Zambia and are divided in two categories (Disabled and Able bodied). The disabled receive K400 per month but it is paid bimonthly (K800). The Able bodied receive K200 and it is also paid bimonthly (K400). Since 2021, the SCT beneficiaries have been enjoying timely disbursements of their money and this should continue to ensure regular payments.

The SCT payments move through nine (9) different commercial banks and the funds are paid within three days of withdrawal by the Pay Point Managers. If the Pay Point Managers fail to make payments within three days, they deposit the money in the bank and the costs incurred are reduced due to the existing service level agreements with the banks. In most cases Pay Point Managers are teachers because they are available across the country in all the districts of Zambia and schools are usually used as pay points.

Examples of SCT payments made between May and June 2022 are given below in figure 20 to figure 29.

Source: Ministry of Community Development

The administration costs in the tables are 3-10% of the total SCT amount. They cover water, electricity, stationery, allowances and they also help to facilitate payment of Pay Point Managers (usually teachers) who make these payments on behalf of the Ministry of Community Development and Social Services. The amount that Pay Point Managers are allowed to carry in a single day is limited to K60, 000 and this is done to minimise risk of loss of funds. Pay Point Managers make several trips to the same Pay Point to make payments and this increases administration costs. The government should consider making SCT payments via mobile money to cut administration costs and to allocate more resources towards the beneficiaries.

According to the Finance Minister, the 2023 National Budget's allocation for Social Cash Transfer payments is expected to be more than the 2022 allocation of K3.1 billion. The increased SCT allocation is due to the expected addition of beneficiaries to the existing list.

SDRs are not a sustainable way of financing the social sector programmes which the Zambian government financed through its allocated SDRs. The Zambian Government should instead look for other sustainable ways of financing its Social Cash Transfer programme. The number of beneficiaries should not increase due to the promise of more aid from its cooperating partners who help fund the programme.

## 2.5.2. FOOD SECURITY PACK (FSP) SDRs REPORT

The Department of Community Development in the Ministry of Community Development and Social Services is responsible for administering the Food Security Pack (FSP). It is one of the Social Protection Programmes in the ministry.

In the 2022 budget, FSP was allocated K1.1 billion. Part of this allocation was funded by the Special Drawing Rights which the Zambian Government received from the International Monetary Fund (IMF). By May 2022, a total of K410, 000, 000.00 had been disbursed by the Ministry of Finance to fund the FSP programme. A breakdown of the disbursements and expenditure is given in the figure below.

**Figure 30. Ministry of Community Development SDRs Funding and Utilisation**

MINISTRY OF COMMUNITY DEVELOPMENT AND SOCIAL SERVICES FUNDING AND UTILISATION OF SPECIAL DRAWING RIGHTS JANUARY TO MAY 2022						
	JANUARY	FEBRUARY	MARCH	APRIL	MAY	TOTAL
<b>FUNDING</b>	40,000,000.00	40,000,000.00	30,000,000.00	150,000,000.00	150,000,000.00	<b>410,000,000.00</b>

Source: Ministry of Community Development

FSP mainly caters for the vulnerable but viable in society and it looks at households with land and labour. For example, it looks at someone who is 80 or 90 years old with land and has children or grandchildren to provide labour.

The FSP programme provides the following during the rain season:

- 2 – 50kg bags of Urea
- 2 – 50kg bags of D-Compound
- 10kg bag of white or yellow maize seed for planting
- 10kg bag of legumes (beans, soybeans or groundnuts)

This is done because the FSP programme is aimed at enhancing food security at the household and community level. Communities across the country store their harvested produce in community storage facilities for use in emergency situations such as droughts or floods.

FSP consists of three components:

1. Rainfed programme – during the rainy season
2. Wetlands programme – includes one bag of Urea and one bag of D-Compound. It concentrates on the growing of vegetables but also includes maize.
3. Alternative livelihood – includes livestock farming (goats and sheep).

The payback from the rainfed programme is 2 – 50kg bags of maize, which is aggregated at the community level and stored within the community. In case of lack of storage facilities in the community, the collected bags of maize are sold and the money is deposited into the community account. The local communities decide how the money in their community bank account is utilised.

The Food Security Pack (FSP) is very different from the Farmer Input Support Programme (FISP). Some of the significant differences include:

1. FSP recipients do not pay to receive government help while FISP recipients pay (K400).
2. FSP focuses on the vulnerable but viable citizens in society
3. FSP beneficiaries have their packages delivered to them by the Department of Community Development, while FISP beneficiaries organise their own transport to collect fertiliser and seeds.

The FSP programme is very critical to enhancing food security at the household and community level and with good coordination in the government, it can also help provide valuable information to the Disaster Management and Mitigation Unit (DMMU) in times of droughts and floods. This is because some communities do have the resources to mitigate these risks and this information is with the Department of Community Development and hence the need for efficient coordination between the ministry and DMMU.

## Conclusion

The Zambian Government used its SDRs to finance part of its 2022 National Budget. It specifically targeted social sector expenditure and even financed 100% of PSPF's 2022 budget through SDRs. Between January and May 2022, the Ministry of Health received the largest allocation of SDRs followed by PSPF, the Ministry of Community Development and Social Services and the Ministry of Local Government and Rural Development received the smallest allocation.

SDRs have helped reduce the waiting period for pensioners to receive their money (from more than three years to less than a year), however, it should be mentioned that SDRs are not a sustainable way of financing PSPF. Due to this, the reforms recommended by the PSPF board are critical to making PSPF sustainable and help it make payments to pensioners. If these reforms such

as the incorporation of public service workers in an occupational pension scheme are not addressed by the government, destitution and poverty among pensioners is likely to go up in Zambia. The government could also address the financing gap by paying what it owes PSPF and the pensioners on the separate payroll should not be on it for too long to avoid government inefficiencies and critical positions being vacant for long periods of time.

The research highlighted that the government should consider making SCT payments via mobile money to cut administration costs and to allocate more resources towards the beneficiaries. Since SDRs are not a sustainable way of financing the social sector programmes which the Zambian government financed through its allocated SDRs. The Zambian Government should instead look for other sustainable ways of financing its Social Cash Transfer programme. The number of beneficiaries should not increase due to the promise of more aid from its cooperating partners who help fund the programme. The same could be said about the youth and women empowerment funds, grants to all the hospitals in the country, the Food Security Pack (FSP), PSPF's financing gap and drugs, medical supplies, equipment and Covid-19 vaccines. All these are great social programmes which the government needs to have sustainable sources of financing in order to enhance them and to keep them running.

The research highlighted the need for government departments such as the Department of Community Development in the Ministry of Community Development and the Disaster Management and Mitigation Unit (DMMU) to coordinate better in times of crisis such as droughts and floods. It also highlighted that the procurement function of the Ministry of Health is now the responsibility of ZAMMSA and that ZAMMSA started on a new footing without any debt in its books. The commercialization of ZAMMSA is critical to it becoming a viable business and its timely funding is also necessary to ensure that it procures enough drugs, medical supplies, equipment and Covid-19 vaccines to be distributed around the country. This could mitigate the shortage of drugs across the country and enhance ZAMMSA's performance.

Since every government has the right to decide how, when and where to spend its SDRs, the JENA/JCTR researchers commend the Zambian Government on how it has utilised SDRs thus far and this level of transparency from the government should continue.
